

TRANSEARCH KinderHilfe Stiftung – a different way of donating

You have been helping us support our second project since the year 2010 which is the construction of new classroom buildings, the purchase of school furniture, learning equipment for a school in Namunanga District Chimbombo in Zambia with over 750 pupils. The TRANSEARCH ChildFund Foundation wants to better the learning environment for these children to enable them a better start in the future and an expansion of the school for up to 1.200 pupils.

In the Zambian school building project certain infrastructural measures need to be taken. These comprise of the construction und re-construction of building blocks, purchase of school furniture, improvement of sanitary facilities and the establishment of a functional water and electricity supply.

Ulrich. F. Ackermann was in Zambia in January this year to monitor the progress that has been made. Since the project initiation in 2010, two new classroom buildings with six classrooms each, attractive teacher flats with eight units each and sanitary facilities have been built. Tables and chairs for pupils and teachers were bought to better the learning conditions. We are thankful for your support and appreciate your commitment. We are still thriving for a school that caters for 1.200 pupils.

- TRANSEARCH KinderHilfe Stiftung would like to encourage business partners and private donors to invest in concrete products instead of gathering just cash amounts. The products are bought locally in order to provide teachers, pupils and parents with an improved learning environment and this is a great benefit for all.
- TRANSEARCH KinderHilfe Stiftung and ChildFund Deutschland have put together a shopping list out of which products with indicated costs can be selected, in order to support the project.
